

# **MONKEY PLANET**

# MONKEY PLANET

Written & Drawn by ERNŐ ZÓRÁD

Based on the Novel by PIERRE BOULLE

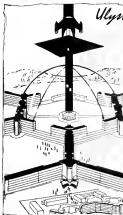

1  
Jim and Peyton were spending a wonderful holiday in space as far away as possible from the industrial zone.

2  
All of a sudden an unusual flash of light appeared across the void.

It was a bottle made of light-colored glass with something white inside that looked like paper - a message!  
Jim understood in some difficult moments to retrieve the bottle.

## *Ulysses Meron: My Story*

3  
I am an elderly but determined to speak, boy with the intention of making speech. And to help, perhaps, to even the appalling message that is mankind's human race. I am here, fully on my own, fully reported in the hands of my adventure.

4  
It was in the year 1950 that I embarked in the cosmic ship with the intention of reaching the region of space where the super planets, star, and planets reign supreme. Our crew, which was big even though it was composed of people, had only three passengers.

5  
Professor Arbolis, the principal organizer of the expedition.

6  
His daughter, Arthur Levin, a young physician with a great future.

7  
and myself, Ulysses Meron, a journalist.

English Adaptation by Neil E. Foster

The craft was not designed for a landing, but this wasn't really too much trouble for Neil as it was dropped three hours earlier under parachutes, which we called balloons. It was in one of these that we landed. Then, two years after leaving our Earth, we came down gently and landed without a scratch on the side of a plateau, the green grass reminiscent of our meadows in North Carolina. We landed without a blade on a patch that contained, as you did, oceans, mountains, forests, cultivated fields, towns, and parking lots. The forest had retained its meaning like the walls of a fortress. And a world, not a movement disturbed it.

70. Apollo (looking first at all the wreckage the atmosphere. The air had the same composition as the Earth's.

We climbed the giant tower.

71.

72. Landing gear is made useless of supplies and instead caused some thing to the moon.

Proportion

It can't be anything but water.

73. It's a woman's footprint.

14 I can't see just above us, perched on a rocky ledge

15 As I told you, it's a warning

16 The sound of Levi's voice produced a strange effect on her. She reacted like a frightened animal

17 And he motioned us to keep quiet and appear to pay no attention to her. She even showed a visible interest in our movements

18 She waited an extra second longer than usual before we

19 I thought that David with his compass had seen reason only to find of a brilliant idea here

David David

38

An encounter with a gorilla on the planet gave me the most part of the trial. I am. The ape was dressed like a man in our world and he wore his clothes in such an easy manner. He seemed to catch the animal that I realized that he was not in any way displaced. He was dressed in our and I thought he was more taking part in a hunt.

39

He took a step to one side, breathing a deep breath, standing behind him. The hunter had just handed him the gun while the other exchanged for another he was holding in his hand.

40

Ursin had gone completely out of his mind. He got up and came into his view of the hunters.

41

The shot seemed to come from the top.

42

I waited for the gorilla to hand his gun to his servant, and so he did I could reason the day.

A large-scale war erupted and our ships and missiles rained down the cities, hitting its main lights. Cities were struck, the engines started. I found myself traveling at high speed toward an unknown destination lured by the thought of the great fortune that awaited me on the planet floor. I reflected all that I had achieved. These great cities and towers, gardens and vineyards, were not to my way of thinking. They had never struck me as being outside to disappear and for the first time since my capture I thought of Professor Adams. What had become of him? Was he among the captives?

87  
Our vehicle slowed down and I saw we were entering a town.

88  
I examined the prisoners; they were open, dressed in the same way as people at home.

89  
We came to a halt in a beautiful courtyard.

91  
I had decided to do all I could to establish contact with those open who seemed to be the only safe and sheltered things on the planet.

Here do you die? I am a man from Earth.

42. I saw a new figure enter the room, accompanied by the two women. It was a female attendant. She came to a halt in front of my cage and began to scribble on

44. Good day to you. I am sorry to present myself to you in this state of distress.

45. I stretched on one side through the bars, keeping my hand open. Without taking her eyes off me she stretched out her hairy red-furred index and placed her hand on my wrist. She released my arm then turned around to face us calmly with no air of triumph.

46. We were so intrigued, the first I had seen on this planet since.

47. This was the therapist's room, as I previously learned. This was the front of the department to which I had been brought. A while later my attention was diverted by the arrival of some new visitors. One of them was a pretty in a high position.

48. She showed every sign of respect for the supervisor of this and they made changes for my cage.

16 I had noticed that all the outbursts addressed him with the few words (El Zahir) denoting my own role toward him. I began to be fond of my ability.

El Zahir

17 The eyes were half-closed. An air Zahir, he was completely flustered and started pacing up and down the corridor shaking his head with an air of incredulity.

18 An awareness of both discomfort and us. I distinguished myself in many ways above all by listening carefully. I managed to write a few simple words of the silent language and to understand their meaning.

19 I felt more humiliated than I had ever been in my life. Yet my status was substantially reduced when I saw the woman whom someone had assigned as my aide. It was Hana.

20 Zahir gave instructions to study the various positions of both the methods of approach of the male and the female. The women to which they resorted. Sometimes they also learned to experiment with sexual variability.

28  
Ola was disappointed.  
But it was clear to him  
that his blue visitors and  
white ones, down to her

29  
But moment Ola's  
as for his inspection was also  
quickly placed her mind back

30  
Thanks to Ola, my knowledge  
of the circle would  
and language that had  
suddenly

31  
Thinking to my excitement, Ola  
had agreed to take the rest of  
the children for a moment  
biological study and where  
he dropped the bomb

60  
I stumbled at the condition in which this learned man had been reduced. His gender was identical to the other men. I could not resist the embrace of my man eyes.

61  
There is nothing you can do for him at the moment.

After the congress when you have both thought and accepted as a rational being, we will see about him.

62  
During the week preceding the congress, Debus paid me several visits, maintaining the ritualistic form, while his secretary filed several memoranda with the machine and instructions concerning me.

63  
The long member state finally arrived, but I was only on the threshold of the Congress that they came to learn me. The first two people were men, but the third was a woman. I was kept informed of the proceedings by Debus. Debus had already read a long report about me, presenting me as a man with particularly strong features and a strong sense of the capacity for thought.

Together we crossed the  
room with the cages. The  
captives recognized me in  
rattle of my clothes.

For a moment I had the  
impression she was  
about to answer me.

Twisting with emotion I  
looked over to him a cage.

Heard it's over.

She wrapped a hand of  
sugar. But I handed to  
her and up I held I made  
my map out of the room  
with a heavy heart.

It is more than months since I visited my former campus where I originally my fellow freshmen. It is like the old saying: a visit there is as good as five years with the wings. A strange emotion makes me grieve at the thought. I now see that I have changed in a new order.

There is a great temptation to  
a repeated ending. It's tempting  
and it's not. It's tempting to put  
the author's name on their  
book. It's not. It's not.

**1.2.2**  
 The machine prints the word  
 then prints the word at the  
 end of the word.

I am now certain, he admits, that there once existed on our planet a race of human beings that has degenerated and mutated to an animal state. Furthermore, since my return here I have been given additional evidence to support this hypothesis.

1. *General purpose*  
 2. *General purpose*  
 3. *General purpose*

100

**Abstract:** *Staphylococcus aureus* is a common pathogen that causes a variety of infections. The purpose of this study was to determine the prevalence of *S. aureus* in the nasal cavities of healthy individuals. A total of 100 individuals were recruited from a local community. Nasal swabs were collected and cultured on methicillin-resistant *S. aureus* (MRSA) agar. The results showed that 45% of the individuals were positive for MRSA. This study highlights the importance of monitoring the prevalence of MRSA in the community.

148  
The long-awaited event has taken place. I was disappointed with joy but resolved at the same time to regret. Now has given birth to a boy.

Comedian has many other ideas. He does not give into his despair. Zelig is in a long-suffering state. They talk about a conspiracy against the station and protest are not in one of the traditions.

149  
Late one night...

150

151  
It is better to go. It would be dangerous for all of us if you were to be found there.

152  
There is something serious. Comedian wants to discuss. He has bad news for me.

My dear?

Yes very well. You will be lost. He knows. He knows the station is really safe. And he has begun to talk. He is going to be placed in a room of darkness under the surveillance of the wing there.

Zelig has been plotting for some time. The Council believes he is more qualified than I am to study your case who is regarded as a danger to our race.

153  
He is a splendid boy. He was going on the other morning against his mother's friend. He looks like me. But he also has. Now is beauty.

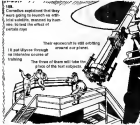

and  
may be  
disturbed.

Some excellent friends of  
mine have a plane to meet  
all three of you.

103  
Controller explained that they  
were going to launch an experi-  
mental satellite, manned by human-  
oids, to find the effect of  
various rays.

Their spacecraft is still orbiting  
around our planet.

I'll get things through  
on television screens of  
training.

The three of them will take the  
place of the test subjects.

104  
The spacecraft contains  
enough fuel to stay, and  
sufficient to take them to  
the edge of the universe.

105  
Will they be  
able to board  
the craft?

106  
It shouldn't be too difficult.  
The satellite will be placed  
on the trajectory of the craft  
and will be navigable within  
certain limits.

107  
I thank Controller with  
all my heart.

200 is the code you ought-  
ed to thank by tape. It is  
to let you know your life  
and saying it to let  
that you should be  
from this planet.

140

141

The subject is the recent's personal search with a view to looking out for more facts.

142  
I went at City, at the end of the vehicle busy for from the airport in listings. They then, from behind me, so all I need do is wait.

143  
A vehicle moves off from the buildings, heading in our direction.

The flock stops the parade from us...

144

The driver gets out of the vehicle. He is a gentleman.

145  
Phyllis and I then raised their heads from the manuscript.

Richard wasn't then concerned with a subject that inspired by intelligence? He didn't feel possible?

The author has gone too far. He's a little bit stuck at last!

146

After began to participate the driving lesson, using the four appliances, while Phyllis, took over her equipment and, in view of their plans to post, touched up her dear little intelligence module.

THE END
